Required when using Rock Spike Series 3 fits down 7' rows. Also can be used on Skid Steer Loaders, Guard Rail Construction

## Fairbrother Industries - Committed to Safety 1st

- Study the Operators Manual, Watch the Assembly & Safety Video, and follow the instructions on the Safety Decal
- Offset controls lets the operator stand safely to the side of the driver
- Post Cap guides the post correctly & protects the operator from impact
- Never stand in front of the driver, always stand to one side of the post being driven
- Use the correct Post Cap or T Post holder to hold the post.
- Change the valve to suit open or closed centre hydraulics
- Always check for underground and overhead obstacles (wires, pipes etc...)
- Make sure all legs are positioned firmly on the ground
- Never use the maximum force of the driver until you are sure the post is being driven straight
- Keep hands away from the top of the post at all times.
- Use the right horse power tractor unit to suit the driver.
- Do not operate the post driver for other uses.
- Use caution when driving small diameter wood and steel posts.
- Wear appropriate Safety equipment (Ear Muffs, Safety Glasses, and Hard-Hat).
- Consider the operating environment (steep slopes can cause roll overs).
- Consider using Safety Guard
